Ayodele John Oluwaseyi

Full-Stack Engineer — TypeScript/Next.js · Laravel/PHP · Flutter · PostgreSQL | Networking & Cybersecurity background
Kampala, Uganda · leojohnseyi@gmail.com · linkedin.com/in/johnoluwaseyi · github.com/johnseyi · johnseyi.github.io

PROFESSIONAL SUMMARY

Full-Stack Engineer with 2+ years of experience shipping production web, mobile, and backend systems for clients in Germany, Nigeria, and Uganda. Built a live B2B e-commerce platform with Next.js, Laravel, Stripe, and Adyen; a multi-tenant cinema platform with fiscalization and Mobile Money; and an offline-first Flutter clinical decision-support app. Delivered 1,600+ commits across 16 repositories in six months, primarily as sole engineer. Specializes in secure offline-first architecture and payment systems for low-connectivity, emerging-market environments.

WORK EXPERIENCE

Full-Stack Engineer Century Cinemax Platform

Kampala, Uganda | Jul 2026 – Present

- Co-build a multi-tenant, white-label cinema platform using a Laravel 13/PHP 8.4 modular monolith with 17 bounded modules, PostgreSQL 16, Redis Horizon, Reverb, and two Next.js 15 applications.
- Own catalog, scheduling, pricing, seating inventory, and booking modules, plus a low-bandwidth server-side rendered customer site optimized for 3G and an offline-capable IndexedDB POS and ticket-scanner PWA.
- Integrate Uganda Revenue Authority EFRIS e-invoicing through queue fan-out and process Mobile Money payment callbacks.
- Maintain architecture decision records, Docker environments, protected branches, OpenAPI-generated TypeScript types, and continuous integration and continuous delivery (CI/CD) through GitHub Actions.

Full-Stack Engineer (Contract) Okelcor GmbH

Munich, Germany (Remote) | Mar 2026 – Present

- Build and maintain Okelcor’s platform as sole engineer, delivering 1,095+ commits across four applications for a German B2B tyre-export business serving 40+ countries.
- Develop a Next.js 15/TypeScript storefront with a 260+ product catalog, advanced filtering, Stripe Checkout, quote workflows, live payment milestones, and downloadable export documents.
- Design a Laravel 13/PHP 8.3 REST API from scratch across 449 commits and 178 database migrations, integrating Stripe, Adyen, Sanctum, Google 2FA, Pusher, VAT handling, invoices, EU trade declarations, and container tracking.
- Maintain an offline-first partner sales-log PWA shipped in 5 days using IndexedDB, phone-and-PIN authentication, and idempotent synchronization across NGN, GHS, KES, AED, EUR, and USD; live at partners.okelcor.com.
- Build a React Native/Expo admin app with biometric authentication, secure token storage, and push notifications.

Full-Stack Engineer (Contract) WellaPath

Nov 2025 – Present

- Build the Flutter mobile app end-to-end as sole mobile engineer, contributing 96 commits and using Hive storage to support offline use in low-connectivity Nigerian clinics.
- Design a schema-validated clinical knowledge base with independently versioned rules, token dictionaries, facility datasets, and JSON artifacts across 4+ major versions.
- Maintain wellapath.org with a build gate covering 48 danger-sign labels, clinician sign-off validation, banned-word linting, automated SEO and accessibility checks, and email or WhatsApp signups backed by Neon PostgreSQL and Resend.

Full-Stack Engineer (Contract) Vitorra Holdings Ltd

Kampala, Uganda | May 2026 – Aug 2026

- Led a complete platform rebuild as sole engineer, delivering 183 commits from requirements through production.
- Migrated the legacy React/Firebase application to a Next.js 16, Laravel, and PostgreSQL monorepo.
- Authored the business requirements document, system design, and design-system specification before deploying vitorraweb.vercel.app.

Humble Vessel Foundation

May 2025 – Aug 2025

Axelus × Boratu

Jun 2024 – Aug 2024

PROJECTS

- **Uganda HIE Bank of Uganda BoU@60 Hackathon:** Built a national Health Information Exchange and Ministry of Health command-center demo solo in 3 days, including 6 role-based portals, consent controls, break-glass access, audit flagging, and disease-hotspot mapping.
- **Afro Zone Munich:** Built a nightclub venue site and administration system with a 5-step booking flow, reference codes, Supabase Realtime, and Row-Level Security-protected access.
- **Chicken Tonight:** Shipped an ordering prototype for a 15-outlet restaurant group in 1 day, featuring MTN Mobile Money, a kitchen display system, and live rider tracking.
- **Healthy Steps Foundation:** Developed a nonprofit site with a Supabase-backed donation flow and server-generated PDF receipts.
- **Takeover Creatives FC:** Built a headless content management system using Next.js and Laravel Filament, with role-based access, on-demand revalidation, and a full test suite.

EDUCATION

BSc Networking & Cybersecurity — ISBAT University, Kampala | *Mar 2023 – Jun 2026*
Diploma in Cybersecurity — AltSchool Africa | *Oct 2024 – Nov 2025*

TECHNICAL SKILLS

Languages: TypeScript, PHP, Dart, JavaScript (ES2022+), SQL, Python (basic)
Frontend: Next.js 15/16 (App Router), React 19, Tailwind CSS v4, Framer Motion, accessibility (ARIA)
Backend: Laravel 13 (Sanctum, Horizon, Reverb, Filament), Node.js (Fastify, Express), REST API design, OpenAPI
Mobile: Flutter (Dio, Hive, offline-first), React Native/Expo (biometrics, push, secure storage)
Data & Infra: PostgreSQL, Redis, Supabase (RLS, Realtime, Storage), Neon, Prisma, AWS (ECS Fargate, RDS, S3, CloudFront, Cognito), Docker, GitHub Actions, Vercel
Payments & Integrations: Stripe, Adyen, MTN Mobile Money, EFRIS e-invoicing, Resend, Pusher, Twilio-style webhooks
Architecture: Offline-first PWAs (IndexedDB, service workers, idempotent sync), multi-tenancy, modular monoliths, i18n
Security: OAuth 2.0/JWT, RBAC, 2FA, Row-Level Security, HIPAA-aware design, secure SDLC
